The Week of March 14th, 2019

"My trip to Buzi was not that good. I left Maputo for Buzi on Thursday 14<sup>th</sup> March... While I was on Bus I heard people saying that it had been announced on radio and television that there would be a hurricane fustigating Beira and the Sofala province. There was no means to just turn back. When we got to Ichope, 200 KM (124 miles) to Beira, the wind and rain started, and it was heavy...And by God's grace people were praying for me."

# Prayer Requests

**The Week of March 14th, 2019**  
**“The bus stopped... The wind and rain was huge.** And the trees and iron sheets from the houses nearby were being discarded on the way... there was no more shelter at the bus station, all the asbestos roof was just pieces on the ground, no means of communication or phone signal. The city of Beira has to start afresh. Just few buildings were left standing...I decided to go back to Muxungue instead of waiting for the worst... Within 5KM we saw many people on the road and many cars that could not go ahead. The road had been washed away. It was flooded all over. From far we could see people on the trees screaming for help, and nobody was able to help them. Some corpses were being drowned by the fierce waters. Nothing I could do”

Through the funds raised, they brought food and building materials during these trips. The third trip will be in September.

*“One of the greatest needs of those isolated people is to have regular crops. They are INCREDIBLE PEOPLE as far as ‘living off the land’ is concerned and they can survive, and THRIVE, in an environment which would absolutely FLATTEN most of us no matter how capable we think we are.....but without regular crops, even they would find it difficult, and the hurricane had washed away the where-withal to restart the cycle of farming.”*

So the upcoming third trip is intended to start rehabilitating their farmland.

They will seek to create a sustainable environment starting with encouraging the people of Buzi to take charge and lead the necessary work in re-establishing their land. They have been intentional in empowering the people of Mozambique to take the lead on their relief work, rather than just being an outside agency which comes and goes. ZEMA has not had the big sums provided by the big NGO’s and Governments (which have really helped the people), but the amaZioni and local people have testified to the grace and kindness shown to the needy by the amaZioni themselves under the leadership of Pastor Muiambo.

The efforts and funds raised have already had a huge impact on the work to be done. The relief provided has changed the worst outcomes that could have fated these people, though there continues to be much work that needs to be done to help re-establish the lives of the people. We thank those who have given towards this effort and invite further contribution prayerfully and financially.

If you would like to help, please mail checks to ZEMA, PO Box 913, Monument CO 80132 and add a note saying it is for ‘Akers Mozambique Relief Project Fund’.

While traveling on his way to run a ZEBS class, Pastor Zacarias Muiambo was caught in the eye of the Idai hurricane in Mozambique.

Throughout March, the province of Sofala was left devastated after hurricane Idai tore through the central coast of Mozambique. The effects of this storm left the district of Buzi especially crippled. Their means of shelter, food, clothing, even transportation, were all taken by the storm with little to no way of recovering on their own.

ZEMA has played a role in providing relief support to this specific area. They chose Buzi due to the state of mass devastation, as well as their previously established ZEBS class right in that district. This provided their efforts with established connections in the area.

Missionary Richard Akers has been working alongside Pastor Zacarias to plan specific visits to Buzi to rehabilitate some of the district. They split their three trips, first as disaster relief, second as consolidation relief, and third as normalization relief. The first two trips they assessed and provided for the greatest, most immediate needs of the people.
