

Jeff and Kim Livingston

2024 ZEMA Annual Report

In 2024 two of our three ZEBS schools, Hammersdale and Mayville were able to attract new students to replace the graduates who left in 2023. Marianhill ZEBS was closed this year because of the low student numbers.

The testimonies of students at each school remains a solid indication that ZEBS is a wonderfully blessed means of communicating the word of God to the amaZioni.

In 2024, Michael Ngcobo and I were invited to more all-night services, one of which has lead to us finding a venue for a new ZEBS situated south of Durban where there is a large amaZioni community and no bible teaching close by. The area is called Kwamakhutha near Amanzimtoti. We were invited by a local bishop to start a school in this area because he had seen the benefit of ZEBS

Family news.....Kim continues to grow her Website design and hosting business, which has seen an increase in clients and is helping to bring in more income to offset the high utility costs that we are experiencing lately. She is also still enjoying teaching free guitar lessons every week at our local church where she an electric guitarist in the band.

As for our Children, our eldest, Jaden, has just completed his first degree year at Vega school and is studying Strategic Brand communication. Jaden turns 21 on the 29 Jan 2025.

Ryan, who is now 18, completed his Roots year of your life course at Red Point church and will register to study a higher certificate in Business administration in 2025. He will be our next licensed driver soon.

Luke, who is now 16, will be starting his GED in 2025 and is gearing himself up for competitive rock climbing which he enjoys and excels at. He is a long lanky spiderlike teen.

Tori has taken a detour from typical homeschooling and has registered for online schooling through Hatfield Online school in Pretoria in 2025. She is enjoying the new experience and taking it in her stride. Tori turns 13 in February.

Please for wisdom and support as we aim to find alternative energy and water sources in 2025, to alleviate the pressure of the high costs of our utilities at home. Jeff, Kim, Jaden, Ryan, Luke and Tori
